Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "earth station" and the "satellite" of claims 54, and 55 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 53 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 53 recites the limitation "said downlink symbol counter" in 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 2663

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 54, and 55 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,452,962 to Linsky et al.

Linsky et al disclose a system comprising:

An earth station transmits synchronization bursts to a satellite (Col. 3, lines 22-26);

The satellite receives the burst; and determines whether the synchronization burst is early or late; and reports to the earth station (Col. 4, lines 8-17).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 53 is rejected under 35 U.S.C. 103(a) as being unpatentable over Linsky et al as applied to claim 54 above, and further in view of U.S. Patent No. 6,243,372 to Petch et al.

Linsky et al fail to disclose transmitting the synchronization burst accordance with a downlink symbol counter. Petch et al disclose a synchronization method that transmits a synchronization burst accordance with a downlink symbol counter (timing counter) (Col. 12, lines 28-43). It would have been obvious to a person having ordinary skill in the art by the time the invention was made to apply the synchronization method taught by Petch et al to the system taught by Linsky et al by making the earth station to transmit the synchronization burst accordance with a

Art Unit: 2663

downlink symbol counter. A skilled artisan would have been motivated to do so in order to prevent overlapping.

Allowable Subject Matter

9. Claims 1-52 are allowed.
